

plurality of clients, wherein the client communications are for combined use with a corresponding and respective plurality of host vehicles, the method comprising:

using for each client decision information to automatically select variable information for each of the plurality of clients, the variable information comprising other than a client identification, and automatically inserting the variable information into each of the client communications.

Remarks

The foregoing amendments do not introduce any new matter, and applicant respectfully requests that the examiner enter the amendments and newly presented claims.

Respectfully submitted,

Shaukat A. Karjeker
